This is an easy-to-follow, interactive training and refresher course. The narrator is smooth. The instructions are clear. The interaction is a nice touch. You don't just have someone droning on about Access. You get a bit of hands-on too. Granted, it's structured but still. The interaction helps reinforce concepts and ideas. It covers quite a bit of basic material to get you up and running in MS Access. This course even includes a chapter on Office 365 and the cloud. You won't find advanced topics like External Data, Web Apps, or VBA but if you're new to MS Access or need a refresher, this is absolutely the course for you.. Just an overview of the program, with the last "chapter" being nothing more than a commercial.. Didn't actually teach anything.
