tidy your room simulator

I came home after a stressful day at school and then i came home started up my computer and looked around on steam for any games that could wash away all the stress and one result was titled Tidy Your Room Simulator i was i little confused but after i saw some screenshots i knew that i had to play this i downloaded it started it up and then had countless minutes of fun. I'll be following you're games.. On par with a good wank!. it's worth the price, so just buy it. This is the most horrible piece of fu2665u2665u2665u2665u2665u2665game i've ever played i got enough money to buy a flamethrower but it didn;t even work.. cant even buy the dang flamethrower. First to tidy my room!. So it's a fun little game but the title is misleading lol. You'll spend more time smashing furniture than actually tidying your room. Here's a gameplay video: <https://youtu.be/c6HLGkKG-Ac> Would I recommend? Well like I say in the video its not something you'll likely play for hours and hours. You'll likely get a good small bit of playtime out of and then put it down for awhile before picking it up again on a boring rainy day or something. Is it worth 2\$? Debatable. Personally I think it would be better as a 99 cent game but oh well. Will I recommend it? If you're a fan of goofy small pick up and play games than yeah go ahead. If you're looking for something more that'll give you hours of

fun then this game won't deliver.
