

# *What is a Tayutai?*

Every living being has Shinki, which is solidified in their bodies.

Apart from that...those invisible but sensible things, and those that can be sensed in human beings who have trained themselves, are called "spirits" and "souls".

Only a few spirits can solidify themselves without an actual body and strengthen themselves. They can use Shinki freely as if they are just using their hands and feet. Such beings are called "Tayutais".

Human beings sometimes worship Strong Tayutais as "god" with the deepest respect. After the ancestor of the Yachimata family, Kageharu Yachimata, sealed Tayutais into the Cocoon together with Kikuramikami no Hime, the record of the existence of Tayutais was purposely hidden, and only a few legends were passed by orally.

Gradually, Tayutais started to be seen as human beings' illusions.

Plus, Tayutais conscious of themselves do not usually care about their names or how they are called.
